The IEEE Transactions on Plasma Science is proud to announce another Special Issue on Pulsed Power Science and Technology, to be published in October 2008. The Standing Technical Committee, Pulsed Power Science and Technology of the IEEE Nuclear and Plasma Sciences Society, along with the Guest Editors, invite contributions to this issue. The objective of this Special Issue is to provide the widest possible distribution of archival quality papers detailing the unique and innovative developments in the areas of pulsed power science and technology. Contributions to the special issue will undergo the same rigorous review standards as typical for all IEEE Transactions and Journals.

All contributions should be submitted electronically IEEE site "Manuscript Central" at: <http://tps-ieee.manuscriptcentral.com/>. Further information regarding the special issue and detailed instructions for submission can be found at www.ieee.org/pubs/authors.html. Papers should be submitted to the website no later than **September 30, 2007** in order to complete the review process in time for the October 2008 publication date. Late submittals will be considered.

Peer review is an important part of producing high quality journal articles. Please consider serving as a referee for our Special Issue by sending an email to one of the Guest Editors.
